

The AI Outreach Kit

50 fill-in-the-blank prompts. 15 message templates.
4 follow-up sequences. One daily loop.

For freelancers, agencies and solo consultants who need clients,
not theory. Works with ChatGPT, Claude or Gemini.

by PitchPilot

How to use this kit

Every prompt is fill-in-the-blank: paste it into ChatGPT, Claude or Gemini, replace every [BRACKET] with your facts, send. Do not skip brackets - a generic prompt produces a generic email, and generic email does not get replies.

Work in this order: Part 1 defines WHO you hunt, Part 2 teaches you to open with THEIR facts, Parts 3-4 are the messages themselves, Parts 5-6 handle objections and pricing. The Bonus is the 30-minute daily loop that makes the rest actually happen.

Rule of thumb: one line about them before one line about you. If your first email says 'we' twice before it says 'you', rewrite it.

Part 1 - Targeting & research (prompts 1-10)

1. ICP builder (ideal client profile)

Act as a B2B sales researcher. Build my ideal client profile. My service: [SERVICE]. Price range: [PRICE]. Clients who got the best results: [PAST CLIENTS/RESULTS]. Return: 3 industries, 3 company size bands, 5 job titles who feel the pain, the triggering event that makes them buy, and 3 disqualifiers. Table format.

2. Pain-to-promise map

Here is my ideal client profile: [PASTE PROMPT 1 OUTPUT]. List the 10 daily annoyances these people have that my service removes, ranked by how expensive each is to leave unsolved. For each: one sentence of their words (forum/slack style, not marketing style).

3. Niche shortlist

I do [SERVICE] for [AUDIENCE]. Generate 12 specific niches (industry + situation, e.g. 'dental clinics adding a second location'), ranked by (a) ability to pay, (b) how badly the problem hurts, (c) how few specialists serve them. Kill any niche where I would compete on price.

4. Trigger-event list

List 12 observable trigger events that mean a [NICHE] company probably needs [SERVICE] in the next 30 days (hiring, funding, expansion, tooling changes, etc). For each event: where I can observe it for free (job boards, news, LinkedIn, product directories) and the exact search string to find it.

5. Lead source build-out

For [NICHE]: give me 8 free places to find a list of these companies (directories, job boards, maps, event sponsor lists, associations). For each: what to scrape/copy, what fields I get (name, site, contact), and one quality check to run before adding anyone to my outreach list.

6. Prospect qualification quiz

I will paste a prospect's website text and LinkedIn snippet. Score them 0-2 on: budget signals, urgency signals, access to decision maker, fit with [SERVICE]. Total 0-8. Under 5 = do not email. Output the score, then the two facts that most prove fit. Here is the prospect: [PASTE].

7. Lead scoring rubric (repeatable)

Turn my qualification criteria into a one-page scoring rubric I can apply in 60 seconds per prospect: 5 dimensions, 0-2 each, with a concrete example of a 0, a 1 and a 2 for each dimension. My service: [SERVICE]. My best clients looked like: [EXAMPLES].

8. Competitor gap finder

Here are 3 competitors my prospect already uses or interviewed: [LIST/URLS]. From a prospect's point

of view, list 6 complaints each competitor's clients probably voice (slow, generic, expensive...). Mark which 2 complaints my offer [ONE-LINE OFFER] directly answers - those go in my email.

9. Case study miner

Here are notes on work I did: [PASTE 3-5 BULLET FACTS: client type, problem, what I did, result with a number]. Write 3 versions of a one-line case study: (a) with the number, (b) with the time frame, (c) humble-brag style for a P.S. line. No superlatives, numbers only.

10. Daily target sheet

Create a one-page daily target sheet for my outreach: given my goal of [X] conversations and [Y] closed deals per month, back-calculate prospects researched, first emails sent, follow-ups due, per working day. Add a 3-column tracker table (prospect, trigger, next action + date).

Part 2 - Personalization (prompts 11-20)

11. Fact-based opener

I will paste a prospect's page/post. Write 5 first lines that reference a specific fact about THEM (their words, their numbers, their timeline). Rules: no compliments about their work, no 'I love what you're doing', max 12 words each. Here it is: [PASTE].

12. Anti-creepy check

Here are 5 opener lines I plan to use: [PASTE]. Rate each 0-10 on the creepy scale (10 = 'I watched you personally'). Rewrite anything above 3 so it references public, business-level facts only.

13. Tone mirror

Here is an email my prospect wrote (their tone): [PASTE]. Describe their style in 3 adjectives, then rewrite my pitch paragraph in that exact register. Keep my facts, swap my voice. My paragraph: [PASTE].

14. Mutual-ground opener

Find the honest overlap between what I do ([SERVICE]) and this prospect's current situation ([THEIR SITUATION]). Write 3 openers that put the overlap in one sentence, so the email reads as 'we already orbit the same problem'. No overlap may be invented - if there is none, say NONE.

15. Trigger-event opener

My prospect just [TRIGGER EVENT: raised funding / posted a job / launched a product]. Write 4 opening lines that connect this event to the specific work it creates for them, ending in the problem, not my name. Max 15 words.

16. The 'their customer' flip

Instead of writing about the prospect, write 3 first lines about their CUSTOMERS ('your [CUSTOMER TYPE] probably hit X when...'). Prospect type: [PROSPECT]. Their customers' main pain: [PAIN]. Lines must show I understand their business, not flatter it.

17. Number opener

Using only numbers from this prospect page [PASTE/URL TEXT], write 3 openers of the form '[number] of [thing they care about] - here is the one-lever fix'. If the page has no numbers, tell me which 2 numbers to go find manually and where.

18. Personalization at volume (30 inboxes)

I will paste 10 rows of prospect data (company, trigger, fact). Write a fill-in template where only these 3 fields vary, everything else stays constant and human. Keep total email under 90 words. Data: [PASTE ROWS].

19. Opener killer audit

Here is my current first email: [PASTE]. Highlight every sentence that is about me instead of them, every adjective without a number, and every phrase a competitor could also say. Return the kill list, then a rewritten version at 60% of the length.

20. Voice guard (sound like a person)

Rewrite this email so it passes the 'written on a phone in 3 minutes' test: contractions, one idea per paragraph, no 'I hope this finds you well', no 'reach out'. Keep every fact. Email: [PASTE].

Part 3 - First-touch messages (prompts 21-30, templates T1-T6)**21. The 40-word cold email**

Write a 40-word cold email. Offer: [ONE-LINE OFFER]. Prospect's fact: [THEIR FACT]. Proof: [NUMBER/RESULT]. Structure: their fact (8w) -> the gap it creates (10w) -> my one-line proof (10w) -> ask for a 12-minute call (8w). No adjectives. Subject line max 4 words.

22. Free-work-sample email

Write an email that leads with a free sample of work, not a pitch. I already made [SPECIFIC SMALL DELIVERABLE] for [PROSPECT COMPANY]: [WHAT IT SHOWS, 1 LINE]. The email offers to send it, asks nothing in return, and books no call. End with: 'want the rest of it?'.

23. Marketplace proposal skeleton

Turn my bid into a 120-word proposal for [PLATFORM: Upwork/etc]. Job post: [PASTE]. Structure: their problem in their words (1 line) -> my plan in 3 numbered steps with durations -> 1 proof line with a number -> 1 question that shows I read the post. No 'I am the best fit' sentences.

24. Referral intro email

Draft an email asking [CONTACT NAME] for an introduction to [TARGET]. Make it forwardable: a 3-sentence blurb about me they can copy-paste, so the introducer does zero writing. My blurb facts: [SERVICE, PROOF, BEST CLIENT TYPE].

25. Warm-event email (same room, same thread)

We both [EVENT: attended X / commented in Y / applied to Z]. Write a 50-word email that references the shared event in line 1, states my offer in line 2, and asks one specific question in line 3. My offer: [OFFER]. Their context: [CONTEXT].

26. The 2-line ultra-short

Compress my pitch to 2 lines, total 30 words, for founders who hate email. Line 1: the outcome I produce with a number. Line 2: 'Worth a 12-minute call?' Offer + proof: [OFFER, NUMBER].

27. Job-posting intercept

This company posted a job ad for [ROLE]: [PASTE KEY LINE]. Write an email that congratulates the hire in one clause, then offers [SERVICE] as the faster/cheaper path for the WORK, not against the hire. Tone: peer, not vendor.

28. Competitor-switch email

The prospect currently uses [COMPETITOR]. Write an email that does NOT insult them: name the 1 thing switchers most often want improved ([WEAKNESS]), offer a free audit of their current setup, and promise an honest 'stay or switch' verdict.

29. Referral-request (client side)

Write a 3-sentence email to my happy client [NAME] asking for one introduction. Make it easy: name the exact person/type to think of, and give them a forwardable 2-line description. My description facts:

[WHAT I DID FOR THEM, RESULT].

30. Re-send with a new hook

My first email got no reply: [PASTE]. Write a 35-word re-send that leads with a NEW fact or trigger (not 'just bumping this'), restates the offer in 6 words, and asks the same ask. New trigger: [TRIGGER].

T1. The 40-word cold email

Subject: [THEIR WORD] + [OUTCOME]

[NAME] - saw [SPECIFIC FACT: their post/hiring/launch]. The gap it leaves: [ONE PROBLEM LINE]. I do [SERVICE]; last client got [NUMBER] in [TIME]. Worth 12 minutes this week?

[YOU]

T2. Free-work-sample email

Subject: made this for [COMPANY]

[NAME] - before any pitch, I [WHAT YOU MADE: rewrote your homepage hero / audited your onboarding]. Attached. If it is useful, I will send the other [N] findings - no call needed. Want them?

[YOU]

T3. Marketplace proposal skeleton

[Their problem, in their words] - that is the part I would fix first.

- 1) [STEP] ([TIME])
- 2) [STEP] ([TIME])
- 3) [STEP] ([TIME])

Did this for [CLIENT TYPE]: [NUMBER RESULT]. One question so I do not quote blind: [QUESTION]?

[YOU]

T4. Trigger-event email

Subject: [TRIGGER] at [COMPANY]

[NAME] - [TRIGGER EVENT] usually means [WORK IT CREATES] is about to hit someone's desk. That is my [SERVICE] lane: [PROOF LINE WITH NUMBER]. If it lands on you, want my [CHECKLIST/PLAN] for it?

[YOU]

T5. Peer referral ask

[NAME] - quick one. Who is the one person you know drowning in [PROBLEM]? I have room for [N] clients this month ([SERVICE], [PROOF]). Happy to return the favor with [YOUR RECIPROCAL VALUE].

[YOU]

T6. The 2-line ultra-short

Subject: [OUTCOME] for [COMPANY]?

I get [TYPE OF CLIENT] [RESULT WITH NUMBER] in [TIME]. 12 minutes to see if [COMPANY] fits the pattern?

[YOU]

Part 4 - Follow-ups (prompts 31-38, sequences S1-S4)

31. The 3-touch sequence (S1)

Build a 3-touch sequence for a prospect who went silent after my first email: day 0 sent, day 4, day 10. Each touch under 45 words, each with a NEW angle (proof, new trigger, easy-out). Offer: [OFFER]. My proof: [NUMBER]. Write all 3 emails, subjects included, no guilt language.

32. Value-drop follow-up (S2)

Write follow-up #2 as a value drop: one useful, specific observation about the prospect's [WEBSITE/FUNNEL/PROCESS] that they can apply without me. End with 'happy to send the full checklist'. It must be true even if they never buy. Their site context: [CONTEXT].

33. The easy-out email (S3)

Write the final touch: 30 words, gives them a graceful exit ('should I close the file?'), and leaves one door open ('if [TRIGGER EVENT] happens, my number still stands'). No passive aggression, no 'per my last email'.

34. Breakup email

Write a breakup email that often RESTARTS threads: 'closing your file' energy, one line of proof I never mentioned ([UNUSED PROOF]), and a one-word-reply option ('reply NOT NOW and I am gone'). Max 45 words, subject under 4 words.

35. Revival email (3+ months cold)

Write a revival email for a prospect who went quiet [TIME AGO]. Hook: something that changed since then ([NEW TRIGGER/RESULT]). One line. Then: 'is this on the table again this quarter?'. 40 words max.

36. No-after-yes recovery

A prospect said 'yes' to a call, then vanished before we booked. Write 2 short emails (48h apart): no blame, one-line calendar push with 2 concrete slots, then a fallback to async ('answer these 2 questions instead and I will send the plan').

37. The bump with an attachment

Write a follow-up that attaches real value: [CHECKLIST/TEMPLATE/SCREENSHOT] I made for them. 40 words: what it is, why it matters to THEIR metric, 'no strings'. Metric: [THEIR METRIC].

38. Sequence spacing advisor

Here is my prospect type: [TYPE] and sales cycle: [LENGTH]. Give me a follow-up calendar: exact days for touches 1-6, what each touch's job is (patience is a strategy), and when to stop. One table.

S1. The standard 3-touch (after first email, silence)

Day 0 - first touch

Use T1 or T4. One fact of theirs, one proof of yours, one ask.

Day 4 - value drop

One specific observation about their [ASSET] they can use without you. End: 'happy to send the full checklist'.

Day 10 - easy out

'Should I close the file on this?' + one unused proof + the door left open. Never send touch 4 to a silent

prospect.

S2. The warm-lead sprint (they replied once, then quiet)

Day 0

Answer their question fully. No new pitch.

Day 2

The concrete next step: 2 calendar slots, 12 minutes, their timezone.

Day 5

Async fallback: 'answer these 2 questions and I will send the plan regardless'.

Day 9

File-closing email. Warm. 'Reply ANYTIME next quarter and this picks up where we left it.'

S3. The breakup sequence (high-value prospect only)

Day 0

Standard first touch.

Day 5

New trigger event + 6-word offer restatement.

Day 12

Value drop (T37-style attachment).

Day 18

Breakup: 'closing your file' + UNUSED proof + one-word-reply option ('NOT NOW' = gone). Highest-reply email in the kit - use once, never twice.

S4. The revival (3+ months cold, once per quarter max)

Day 0

Revival opener: '[NAME] - [THING THAT CHANGED] changed the math on [PROBLEM]. Is this on the table again this quarter?'

Day 6 (if reply)

Move straight to 2 calendar slots. No re-pitch - the old thread did that work.

Day 6 (if silent)

Nothing. Re-enter next quarter with a new trigger. Revival works by scarcity, not persistence.

Part 5 - Objections (prompts 39-44, templates T7-T11)

39. 'Too expensive'

Prospect says my [PRICE] is too expensive. Draft 3 replies: (a) reframe to cost of the problem with their number, (b) slice scope to a smaller first step [SMALLER OFFER], (c) honest walk-away with the door open. None may discount without getting something in return.

40. 'We already have someone'

Reply to 'we already work with [AGENCY]'. Structure: genuine respect (1 line) -> the 2 things outsiders typically add ([MY EDGE]) -> offer a free second opinion, not a switch -> 'if they are great, you will know in 20 minutes'.

41. Ghost-after-yes revival

Prospect agreed on price and scope, then went silent. Write 3 short nudges: (1) logistics-only ('anything you need from me?'), (2) a useful nudge ('saw [TRIGGER], still holds'), (3) the file-closing email. Warm, zero pressure, each under 50 words.

42. 'Send me a deck' staller

Reply to 'send me a deck' from a prospect who has gone quiet after every document. One-line deck attached + 2 qualifying questions that force a real answer ('what would the deck need to show for this to move in Q[X]?').

43. 'Not a priority now'

Reply to 'we are heads-down until [DATE]'. Agree with them (no arguing), pin a concrete revisit date, and offer a zero-effort bridge ([SMALL DELIVERABLE] I can do before then). 45 words.

44. The 'no' collector

Prospect said a clear no. Write one last 30-word email: thank them, ask ONE improvement question ('what would have made this a yes?'), and give permission to ignore. This is how a no becomes next quarter's yes.

T7. 'Too expensive' reframe

Fair. For scale: [PROBLEM] costs you about [THEIR NUMBER] a month in [LOSS]. My [PRICE] exists to remove that. If the number does not hold for your case, I will tell you and point you to a cheaper fix. Want me to run it?

T8. 'We have someone' respect reply

Good - [AGENCY] does solid work on [X]. Where clients usually want more is [EDGE 1] and [EDGE 2]. I am not here to replace anyone; I do a free second opinion on [AREA] - 20 minutes, keep it or bin it. This week?

T9. Ghost-after-yes nudge

[NAME] - logistics only: need anything from me to lock [DATE/SCOPE]? If the timing slipped, say the word and I will hold [NEXT SLOT].

T10. Deck-staller breaker

Deck attached (1 page, the honest version). To make it worth your time: what would it need to show for this to move in [Q/DATE]? If the answer is 'nothing yet', I will close the file - no hard feelings.

T11. The graceful no-keeper

Understood - thanks for the straight answer. One question and I leave you alone: what would have made this a yes? Answer or ignore, both fine. If [TRIGGER] shows up next quarter, my door is open.

Part 6 - Offers & pricing (prompts 45-50, templates T12-T15)**45. Offer sharpener**

Sharpen this offer until it is specific enough to picture: [MY OFFER AS IS]. Output the sharp version as: 'I help [WHO] get [RESULT] in [TIME] without [PAIN THEY FEAR], or [GUARANTEE/DE-RISK]'. Then list 3 things to remove because they weaken it.

46. 3-tier price ladder

Build 3 tiers for my service [SERVICE]: a [LOW-TOUCH ENTRY \$X], a core offer [\$Y], and a premium [\$Z]. For each: what is included, what is explicitly NOT included, who it is for, and the one-line upsell from tier to tier. Anchor prices to [MY TARGET MONTHLY].

47. Past-client reactivation

Write a reactivation email to past clients of [WHAT I DID]: one line of memory (their result with the number), one new thing I offer now ([NEW OFFER]), and a soft ask ('worth 15 minutes?'). 50 words.

48. Referral engine

Design a referral loop for my [SERVICE] clients: when to ask (the happy moment), the exact 2-sentence ask, what I give in return ([REWARD]), and the forwardable blurb. Output as a 4-step script I can run in under 10 minutes per client.

49. Proposal one-pager

Turn this into a one-page proposal: client [NAME/TYPE], problem [PROBLEM], outcome [RESULT WITH NUMBER], plan in 3 steps with dates, price [PRICE], terms [TERMS], guarantee [DE-RISK]. Sections max 3 lines each. End with one clear next action.

50. The 90-day pipeline plan

Given [HOURS/WEEK] and a [PRICE] ticket size, build my 90-day outreach pipeline: weekly prospecting quota, first-touch volume, expected reply/call/close rates for a new freelancer (use conservative numbers), and a weekly scoreboard. Output as one table I can print.

T12. Offer sharpener output

I help [WHO - exact title] get [RESULT - with a number] in [TIME] without [PAIN THEY FEAR]. If [MEASURABLE CONDITION] does not happen, [DE-RISK: don't pay / full refund / free extension].

T13. 3-tier ladder (fill-in)

Tier 1 [PRICE A]: [NARROW AUDIT/SPRINT], 1 week, no meetings. Tier 2 [PRICE B]: the full [SERVICE], [TIME], weekly proof. Tier 3 [PRICE C]: Tier 2 + [PRIORITY, EXTRAS, ACCESS]. Most clients take Tier 2; Tier 1 exists to start, Tier 3 to anchor.

T14. Past-client reactivation

Subject: [THEIR RESULT] - one year later?

[NAME] - [THEIR RESULT WITH NUMBER] still one of my favorite projects. Since then I added [NEW OFFER] - built for exactly where [COMPANY] is now ([THEIR CURRENT SITUATION]). 15 minutes to see if it fits?

[YOU]

T15. Referral ask (happy moment)

[NAME] - glad [RESULT] landed. Quick favor: is there one person in your network with the same [PROBLEM] you had? Forward this line if so: '[ONE-LINE DESCRIPTION OF WHAT YOU DO + PROOF]'. I take care of anyone with your name on them.

Bonus - the 30-minute daily outreach loop

One table, sticky-note size:

Minutes 0-5: pick 5

From your list, pick 5 prospects with fresh triggers. No trigger = not today.

Minutes 5-15: research

One fact per prospect worth opening with (their words, their numbers). Paste into your tracker.

Minutes 15-25: send 5 first touches

Use T1/T4, personalize the one line, send. No perfecting - sent beats polished.

Minutes 25-30: follow-ups

Clear every follow-up due today (S1-S4). Update the tracker: prospect, trigger, next action + date. Done. Same time tomorrow.
